The above total reflects cases received by DPHHS during the period specified. Additional conditions and counties will be added as cases are reported.

Outbreaks/Events of Interest:

- Beaverhead Co. Reported a community gastroenteritis outbreak that appears to be primarily person to person spread. Approximately, 70 cases have been identified with a few clusters in institutional settings. Local tests for bacterial pathogens were negative and the illness and recovery are consistent with a Norwalk-like agent
- Blaine Co. January: A gastroenteritis outbreak sickened approximately 35 individuals associated with a wrestling tourney in Blaine Co. Individuals ill were residents of several counties. Norovirus suspected.
October: An outbreak of gastroenteritis with diarrhea and cramping sickened an estimated 100 of 225 exposed during a sports related potluck. No medical care was sought. A local investigation identified food handling issues and Clostridium perfringens is suspected given the results of the investigation.
- Cascade Co. January: A gastroenteritis outbreak in a nursing home resulted in approximately 115 residents are inn with gastroenteritis.
- Fergus Co. January: A gastroenteritis outbreak in a nursing home sickened approximaely 10 staff and 12 residents with gastroenteritis. No causative agent was found in samples submitted.
September: A cluster of upset stomachs (vomiting, no diarrhea) was reported in daycare center, appx 14 of 45 were ill during 2 day period.
October: Approximately 3 individuals are reported ill after ingestion of homemade salsa. No human specimens were tested and all recovered after a GI illness.
- Flathead Co. February: A suspected norovirus outbreak in a long term care facility sickened 30 staff and 45 residents. No causative agent identified
- Fallon Co. February: A gastroenteritis outbreak in a long term care facility sickened 9 staff and 7 residents. No causative agent identified
- Hill Co. August: A cluster of illnesses following a family functions sickened approximately 30 individuals with upset stomach and vomiting. No suspect agent or food item at the potluck was implicated. Staph poisoning was suspected as cause of the outbreak.
- Lewis & Clark Co. A rare case of intestinal (formerly infant) botulism was confirmed after isolation of the organism from stool. No source determined.
- Missoula & Flathead Co. An outbreak of a acute short-lived respiratory condition affected 10 individuals staying at a local motel. At present, the hot tub appears to be the only common exposure. Exposure to Legionella is suspected. Clinical testing for Pontiac Fever (the less severe syndrome caused by exposure to Legionella) is problematic and has been unsuccessful in this case.
A cluster of salmonella cases associated with a local restaurant was identified and investigated. App. 47 cases have been identified and app 30 are lab confirmed, establishment has reopened and surveillance for cases will be conducted. No specific source of the illness was pinpointed during the investigation.
- Pondera Co. October: A cluster of gastroenteritis involving nausea and vomiting was reported to sicken 5 of 15 children attending a party. No causative agent or food identified.
- Sanders Co. April: An outbreak of gastroenteritis at a local school sickened approximately 150 students and staff. The illness was consistent with a viral agent, however, no specimens were collected.
A smaller GI outbreak at a local nursing home sickened 6 of 27 residents, bacterial testing was performed and negative. Both instances are consistent with a Norwalk-like agent.

Communicable Disease Reports Received by DPHHS from December 4th to December 10th, 2005 (week 49)
